

DISCRETE OPTIMIZATION

EDITOR-IN-CHIEF Nimrod Megiddo, IBM Almaden Research Center

ASSOCIATE EDITORS

Alper Atamturk, University of California, Berkeley
Egon Balas, Carnegie Mellon University
Philippe Baptiste, Ecole Polytechnique
Daniel Bienstock, Columbia University
Endre Boros, Rutgers University
Rainer Burkard, Technische Universität Graz
Gerard J. Chang, National Taiwan University
Yves Crama, Université de Liège
Dominique de Werra, Ecole Polytechnique Fédérale de Lausanne
Zvi Drezner, California State University
Uriel Feige, Weizmann Institute of Science
Satoru Fujishige, Kyoto University
Gregory Gutin, University of London
Horst Hamacher, Universität Kaiserslautern
Alexander Karzanov, Russian Academy of Sciences
Bernhard Korte, Universität Bonn
Thomas Liebling, Ecole Polytechnique Fédérale de Lausanne
Silvano Martello, University of Bologna
Michel Minoux, Université P. et M. Curie
Denis Naddef, Institut National Polytechnique de Grenoble
Hiroshi Nagamochi, Kyoto University
Shmuel Onn, Technion - Israel Institute of Technology
James Orlin, Massachusetts Institute of Technology
Gerhard Reinelt, Universität Heidelberg
Franz Rendl, Universität Klagenfurt
Celso C. Ribeiro, Catholic University of Rio de Janeiro
Andreas Schulz, Massachusetts Institute of Technology
Sergey Sevastianov, Sobolev Institute of Mathematics, Russian Academy of Sciences
Bruno Simeone, Università degli Studi di Roma, La Sapienza
Maxim Sviridenko, IBM T.J. Watson Research Center
Paolo Toth, University of Bologna
Craig Tovey, Georgia Institute of Technology
Jens Vygen, Universität Bonn
Robert Weismantel, Otto-von-Guericke-University of Magdeburg

FOUNDING EDITOR Peter L. Hammer (1936–2006)

Discrete Optimization publishes research papers on the mathematical, computational and applied aspects of all areas of integer programming and combinatorial optimization. In addition to reports on mathematical results pertinent to discrete optimization, the journal welcomes submissions on algorithmic developments, computational experiments, and novel applications (in particular, large-scale and real-time applications). The journal also publishes clearly labelled surveys, reviews, short notes, and open problems. Manuscripts submitted for possible publication to **Discrete Optimization** should report on original research, should not have been previously published, and should not be under consideration for publication by any other journal.
